

Electronics Projects and Tutorials

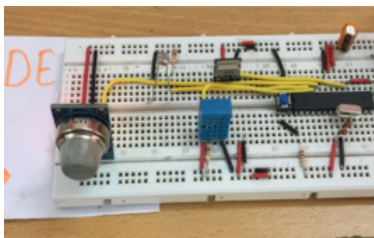

Explore more than 2000+ [electronics projects](#) ideas on [Arduino](#), [Raspberry Pi](#), [Esp](#), [stm32](#) and many other [high end MCU's](#). Learn in-depth latest technologies like [iot](#), [Sensors](#), [EV's](#), [power](#), [audio](#), [battery management](#), LoRa, embedded, [EMI's](#), [Hardware filters](#) and many more with our [tutorial series](#) explained with application based projects. We have many mini diy projects and real time applications. The projects are designed for beginners, hobbyists & electronics enthusiasts who are eager to learn more about electronics. You can visit our [FB page](#) for daily updates and [youtube](#) for project videos. Please check the complete list below.

PROJECTS

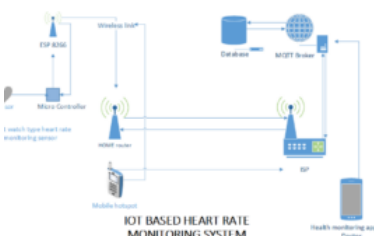

[SEE MORE ELECTRONIC PROJECTS >](#)

How to create a smart restroom indicator using simple hardware-No code, No cloud

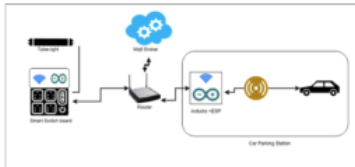

Wearable emergency system for mine workers using Arduino Uno

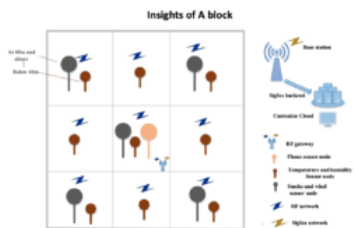

IoT-based heart rate monitoring system

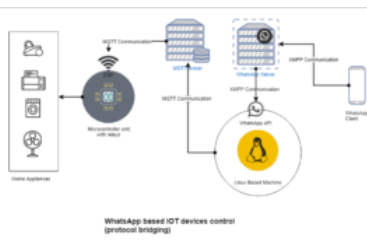

How to use IoT-based D2D automation

Forest fire detection system using IoT sensor network

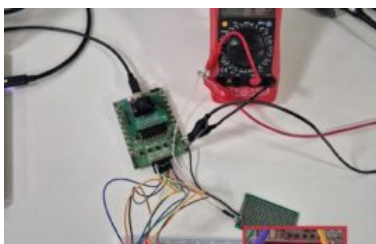

WhatsApp-based home automation: Protocol bridging with MQTT

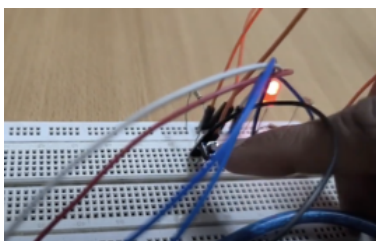

WhatsApp-based home automation

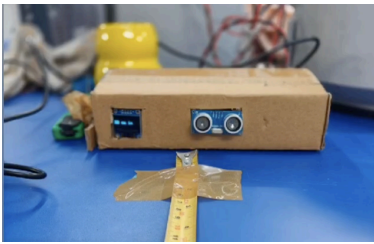

How to implement a voltmeter with a 3-digit, 7-segment indicator

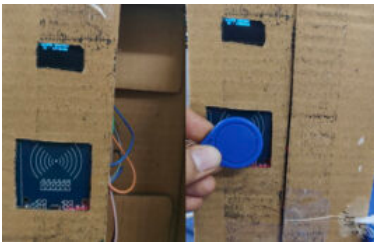

How to wake ESP32 from deep sleep using EXT1

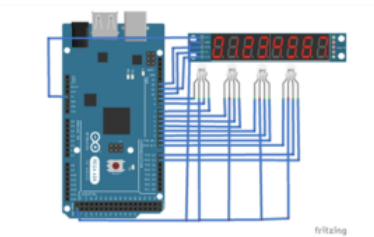

How to design an ESP32-based text-to-speech engine

How to design a distance meter using ESP32

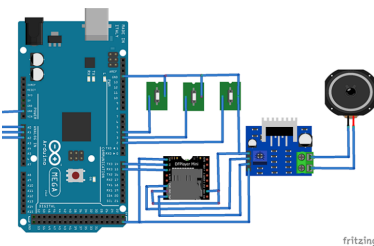

How to create an RFID-based locker system using Arduino

How to design an Arduino-based traffic light system

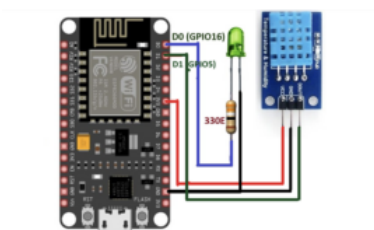

How to capture images using ESP32-CAM and an SD card

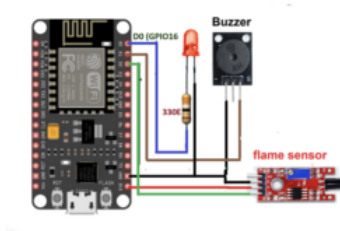

How to design an Arduino-based meditation device

TUTORIALS

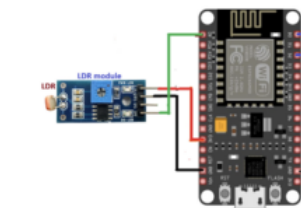

[SEE MORE ELECTRONIC TUTORIALS >](#)

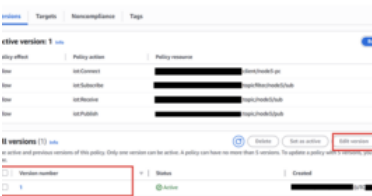

Designing embedded systems with MicroPython and NodeMCU (Part 8)

Designing embedded systems with MicroPython and NodeMCU (Part 7)

Designing embedded systems with MicroPython and NodeMCU (Part 6)

How to enable device-to-device messaging on AWS IoT Core using MQTT

How to connect Raspberry Pi to Amazon AWS IoT Core using MQTT

How to connect ESP32 to AWS IoT Core using MQTT

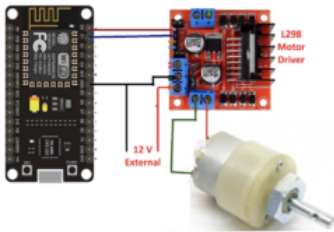

How to connect a computer to AWS IoT Core

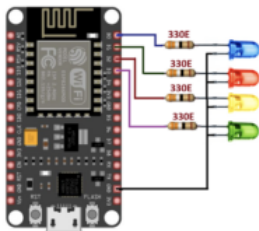

How to design a JavaScript application for communication with AWS IoT Core

Top AI domains and career paths in 2026

Interfacing actuators using MicroPython and NODEMCU (Part 5)

Embedded system design using MicroPython and NODEMCU (Part 4)

How to design a DIY “useless box” and learn the basics of electronics

Würth Elektronik introduces WSEN-PDMS differential pressure sensor

India's top semiconductor startups of 2026

VHDL Tutorial – 11: Designing half and full-subtractor circuits

VIDEOS
